As an enthusiastic and self-motivated full stack developer, fresh out of college and currently pursuing a master's degree, I bring a strong foundation in both frontend and backend technologies. While my professional experience may be limited, my passion for creating seamless user experiences and visually appealing interfaces drives my development process. With hands-on experience in React for frontend and Express.js for backend, I am eager to contribute my skills to Studio Shodwe, collaborate on innovative web projects, and grow alongside a talented team.

## Projects

- **Social Media Platform for College**
  - Developed a social media platform for students, enabling communication and collaboration within the college community.
  - Implemented user authentication, post creation, and real-time notifications using React.js and express.js.
  - Collaborated with a team of four to deliver a seamless user experience.
- **Dentist Appointment Booking Website**
  - Created a responsive website for a dental clinic, allowing patients to book appointments online.
  - Designed the frontend using HTML, CSS, and React.js.
  - Developed a custom API using Express.js to handle appointment scheduling .

## Skills

- **Frontend Development:**
  - Proficient in HTML, CSS, React.js, React native, and Next.js .
  - Experience with responsive design and cross-browser compatibility.
- **Backend Development:**
  - Created RESTful APIs using Express.js.
  - Familiar with database management (MongoDB, PostgreSQL, prisma ...etc).
- **Project Management:**
  - Successfully collaborated with teams to deliver high-quality projects during my collage.
  - Strong problem-solving skills and attention to detail.
